Run

Output

```
import java.util.Scanner;
```

```
public class Main {
```

```
    public static void main(String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
        int[] arr = {10, 20, 30, 40, 50};
```

```
        System.out.print("Enter the index: ");
```

```
        int index = sc.nextInt();
```

```
        if (index >= 0 && index < arr.length) {
```

```
            System.out.println("Element at index " + index + " is: " + arr[index]
                                );
```

```
        } else {
```

```
            System.out.println("Invalid Index");
```

```
        }
```

```
        sc.close();
```

```
    }
```

```
}
```

Enter the index: 30

Invalid Index
