

```
import java.util.Arrays;

public class Main {
    public static int findKthSmallest(int[] arr, int k) {
        // Sort the array in ascending order
        Arrays.sort(arr);

        // Return the element at index k-1
        return arr[k - 1];
    }

    public static void main(String[] args) {
        int[] arr = {7, 10, 4, 3, 20, 15};
        int k = 3;
        System.out.println("The " + k + "th smallest element is: " + findKthSmallest(
            arr, k));
    }
}
```

Output

The 3th smallest element is: 7
